

Matthew Horan

Digital Imaging
Assignment - A1

Select 5 catagories out of 14 given
Take 3 photos for each category
Arrange photographs in Adobe InDesign
Provide information to support each photo

Category 1: Architecture

This is a photo I took of Dunhill castle. I took a few photos from the bottom from various distances, the one taken closest looked the best as it had a better sense of scale.

Category 1: Architecture

This photo is the back entrance of Dunhill castle. I made sure to center the photo and found what distance and angle to the entrance looked right.

Category 1: Architecture

This is a bungalow I found in Annestown. I took it from the other side of the road but wanted a close up shot to give it more character so I zoomed in, I also took it at an angle instead of perpendicular for the same reason. The red door is aligned with center and the break in the wall is aligned with the bottom right third of the photo.

Category 2: Gates

This is a photo of a gate on the Anne Valley walk. I aligned the gate to the center of the screen, and then aligned the center of the gate across the road with the center of the closer one. Doing this the sun aligned with the center horizontally and also aligned with the telephone cable.

Category 2: Gates

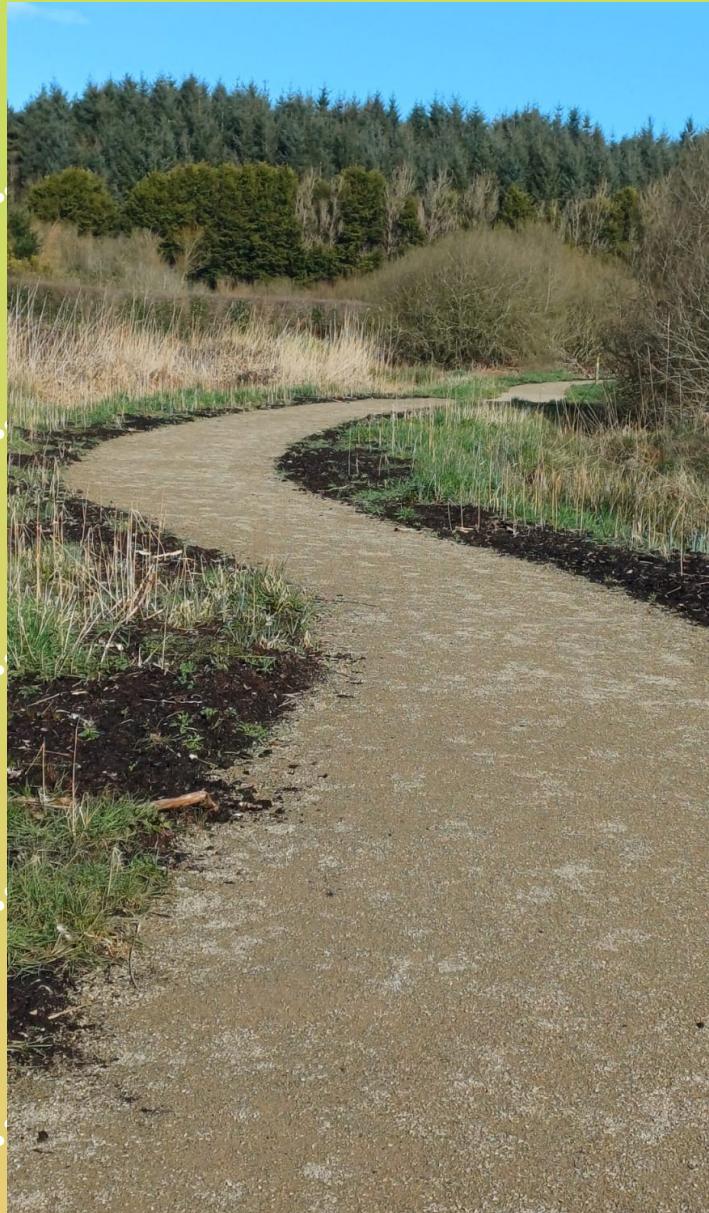

This is another gate I found on the Anne Valley. This one has a nice consistent height while being quite wide. I tried my best to keep it centered while taking.

Category 2: Gates

This gate is next to Annestown Beach. Took this one because I liked the square shape of it. I center aligned the gate and tried to have the stone walls be consistent on either side.

Category 3: Pathways

This is another photo of Anne Valley. I took this portrait to try get as much of the path in frame. I tried getting as much of the background in as possible too.

Category 3: Pathways

This is the path that leads to the back of Dunhill castle. I took a few photos from different distances and thought this looked the best.

Category 3: Pathways

This photo is also of Anne Valley. I took this one because I liked how the curve of the road is matched with that of the fence. Took in portrait to try get as much in frame as possible.

category 4: Nature

**Saw this while driving home. I like the one
asymmetry to it. Took from angle where
you can see the curve.**

category 4: Nature

This is a photo from the walk up to Dunhill castle. I aligned the photo so the tree is in the right third of the photo, and the car park is taking up the least space in the bottom left third.

category 4: Nature

This is a photo facing out of the window in Dunhill castle. I moved a distance that looked good, made sure the lighting wasnt too bright.

Category 5:

Red

This is a stop sign. I lined it up with the center of the frame and tried to take the photo as straight as possible.

Category 5:

Red

This a photo of a house I found on the Anne Valley. I took a few photos from different distances to include more or less of the steps at the gate.

Category 5: Red

This is a photo there is a composition of a few red items I could find around my house. The photo was taken with my camera pointing straight down.
